

ENVIRONMENTAL IMPACT MITIGATION SUPPLIER POLICY

we fully comply with national and international legal requirements in all our activities; we constantly try to reduce the environmental impacts caused by our suppliers and services through the use of continuous improvement tools and appropriate technologies.

With our sustainable environment and energy understanding, we aim to leave a clean and livable world to future generations.

MARGÜN,

- Prevention of pollution at source and reduction of environmental risks,
- Reducing the environmental impacts of our products with the life cycle approach,
- Responsible and efficient use of energy and natural resources,
- Providing trainings in order to increase the environmental awareness of our employees, suppliers and society,
- Audit and continuous improvement in order to establish environmental awareness of our employees, suppliers and society,
- Controlling and improving both inputs and outputs
- Participation of environmental awareness in supplier selection and evaluation processes, in this context, conducting research on environmentalist approaches in the purchasing process,
- Adding environmental criteria to the supplier selection criteria, evaluating environmental impact performances, preferably selecting suppliers with ISO 14001-ISO 5001 similar certificates,

It is committed to mobilizing its resources and facilities by effectively implementing its integrated management systems.
